CMI95M[®]

Measure copper foil thickness in less than a second

The **CMI95M** is a battery powered handheld gauge for measuring copper foil thickness and laminate thickness on PCBs from 1/8 to 4.0 oz/ft² (5-140µm) in less than a second

The Business of Science[®]

Oxford Instruments introduces the **CMi95M** – a battery operated handheld gauge for measuring copper foil thickness on printed circuit board substrate materials from 1/8 to 4.0 oz/ft² (5-140µm) in less than a second.

The **CMi95M** is factory calibrated and requires no standards. It is so easy to use – just touch the unique soft-touch probe to the copper surface and note the thickness indication.

Oxford Instruments offers a worldwide network of support and service. Like all our instruments, the **CMi95M** is backed by our guarantee of superior service before and after you order.

- Avoid high scrap and rework costs – identify out of spec copper foil thickness fast and accurately
- A field proven, robust, simple to use and affordable handheld gauge that sorts copper foil and laminates by thicknesses
- Eliminate board damage – the new **CMi95M** has an exclusive soft touch probe to prevent the copper surface from being marred or scratched
- Proven durability and simple to use
- Factory calibrated and requires no standards
- Low battery warning
- CE approved

Specifications:

Dimensions : (W) 2.5" (66 mm) (D) 1.25" (32 mm) (H) 4.1" (104 mm)

Weight : 4.4 oz (125 grams)

Battery : 9 volt

Ranges :	Oz/Ft²	1/8	1/4	3/8	1/2	1	2	3	4
	µm	5	9	12	17	35	70	105	140
